

Five reasons why you should choose a Sectional Garage Door

1

Any size, any shape opening

Sectional garage doors don't interfere with the aperture of the garage opening, so they can be manufactured to fit unusually-shaped entrances and still perform without any issues.

2

Space saving

With no outswing to worry about, a sectional door won't take up any space outside your garage. Perfect for homes with short driveways; you can park right up to the garage door without ever disrupting how you get in or out of your garage.

3

More secure than older doors

Manual up and over garage doors have many pivot points which criminals can manipulate to gain access. With our sectional garage doors there are no leverage points leaving burglars disappointed and your property safe.

Even with age, sectional doors won't come loose around the frame. Criminals won't be able to use gaps along the top or sides to pry the door open.

4

Stylise your exterior

Whatever your style, our sectional garage doors are made to measure and can be colour matched too!

Whether you're looking for a clean, contemporary feel or a cosy, traditional look, sectional garage doors offer the widest of styles options.

5

Protect against the elements

Save money on your energy bills and maintain the temperature inside your garage. Sectional garage doors offer the insulation you need to keep your garage at the right temperature.

Want to learn more about how a sectional garage door could revolutionise your garage, get in touch with our friendly team today. We supply and install roller doors across the UK, and our team work closely with you to ensure you choose the perfect garage door for your property.
